Re: Granville Solvents Site

Dear Doug:

Thank you for taking the time June 22 to meet with us to discuss the status of the Granville Solvents matter. As you are aware, the PRP group is in a position to develop a revised remediation plan to address conditions at the site; your cooperation and assistance is much appreciated.

The PRP group, through its consultant, has developed an approach which includes the treatment of certain off-site ground water and contaminant control at the source. Other alternatives that have been suggested, such as well replacement, will not provide adequate long-term protection for the Village. Conversely, the PRP Group's conceptual approach will provide an added level of security for the well field and allow the Village to maintain its historical water supply capacity.

Your stated support for the Group's approach was appreciated. Ohio EPA's position expressed at the conclusion of the meeting, that it is appropriate for the PRP Group to proceed with the conceptual design as outlined June 20 to EPA and to you at the meeting, facilitated moving this project forward.

We will work with you in sharing and distributing the necessary and appropriate information to your constituency so that

there are no misunderstandings about the appropriateness of the agreed upon approach for addressing conditions at the site.

Again, thank you for your cooperative spirit. As always, should you have any questions please call me.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'B. L. Pfefferle, III'. The signature is stylized with a large initial 'B' and a series of loops for the last name.

Ben L. Pfefferle, III
